

## 8-Bit, 100 MSPS, Low Power Pipeline Analog to Digital Converter (ADC)

SCL Part No.

SC1261-0T1

### PRODUCT DESCRIPTION:

The 8-bit 100 MSPS is a monolithic CMOS analog-to-digital converter capable of converting analog input signals into 8-bit digital word upto at 100 Mega samples per second (MSPS). This converter uses a differential, pipeline architecture with digital error correction. The differential inputs take a full scale differential swing up to 1V<sub>pp</sub>. The device has on chip voltage reference.

### FEATURES:

- Operating Voltage: 3.3V
- Resolution: 8-Bit
- Data Rate: upto 100MSPS
- Input Range: 1V<sub>p-p</sub> Differential Ended/Single Ended
- No missing code Guaranteed
- Output Data Format: Straight Binary
- Power Consumption < 530mW
- SCL's 180nm CMOS Technology
- Operating Temperature (TA): -55°C to +125°C
- Packaged in 20 Pins CFP package
